JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Ab initio calculations
Underpotential versus overpotential deposition: a first-principles calculation 183
Absorption and phase formation
Structural transitions in 2,2′-bipyridine adlayers on Au(111)—an in-situ STM study 121
Amperometric biosensor
Characterization of organosilasesquioxane-intercalated-laponite-clay modified electrodes and (bio)electrochemical applications 73
Arrhenius analysis
Reorganization energetics for ferrocene oxidation/reduction in self-assembled monolayers on gold 17

BAM3G™
Solid-state electrochemical oxygen reduction at Pt | Nafion® 117 and Pt | BAM3G™ 407 interfaces 1
Biffircation
Discontinuous immittance due to a saddle node bifurcation: I: 1-, 2- and 3-part immittance diagrams 231

Carbon paste electrodes
Electrochemistry of hydrotalcite-supported bis(2-mercapto-2,2-diphenyl-ethanoate) dioxomolybdate complexes. 31
Chronoabsorptometry
Spectroelectrochemical approaches to heterogeneous electron transfer reactions at the polarised water | 1,2-dichloroethane interfaces 139
Clay modified electrode
Characterization of organosilasesquioxane-intercalated-laponite-clay modified electrodes and (bio)electrochemical applications 73
Clay-modified electrodes
Electrochemistry of hydrotalcite-supported bis(2-mercapto-2,2-diphenyl-ethanoate) dioxomolybdate complexes. 31
Coloumbic interaction
Electrochemistry of heteropolyanions in coulombically linked self-assembled monolayers 87
Computer simulation
A computer simulation model for the diffusion controlled nucleation and growth processes on electrode surfaces—a two-dimensional study 55
Convolution
Combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD): validation of the technique by a study of silver ion mass transport 241
Covalent surface reactions
A voltammetric investigation of the reactions between surface-confined amines and quinones on gold electrodes: evidence for imine formation 7
Cyclic voltammetry
Electrochemical study of metallothioneins using cyclic voltammetry 199
Electrochemistry of hydrotalcite-supported bis(2-mercapto-2,2-diphenyl-ethanoate) dioxomolybdate complexes. 31
Voltammograms of thin layer Pd | H(D) electrodes in the coexistence of α and β phases 107

Delay times
The pseudostationary mercury electrode 43
Differential cyclic voltabsorptometry
Spectroelectrochemical approaches to heterogeneous electron transfer reactions at the polarised water | 1,2-dichloroethane interfaces 139
Diffusion controlled processes
A computer simulation model for the diffusion controlled nucleation and growth processes on electrode surfaces—a two-dimensional study 55
Di-imines
A voltammetric investigation of the reactions between surface-confined amines and quinones on gold electrodes: evidence for imine formation 7

Electrochemical doping
Electrochemically pH-controllable 3-substituted polythiophene films 155
Electrochemical kinetics
Use of sensitivity analysis methods in the modelling of electrochemical transients: Part 3. Statistical error/uncertainty propagation in simulation and in nonlinear least-squares parameter estimation 209
Electrochemical quartz crystal microbalance
Combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD): validation of the technique by a study of silver ion mass transport 241
Electrodeposition
A computer simulation model for the diffusion controlled nucleation and growth processes on electrode surfaces—a two-dimensional study 55
Electrolyte electroreflectance
The scanning microscope for semiconductor characterization (SMSC): electrolyte electroreflectance and photovoltage imaging study of the electrochemical activation of RuS_2 photoelectrodes for oxygen evolution 99
Electron transfer rate constant
Spectroelectrochemical approaches to heterogeneous electron transfer reactions at the polarised water | 1,2-dichloroethane interfaces 139
Electron-transfer rates
Reorganization energetics for ferrocene oxidation/reduction in self-assembled monolayers on gold 17
Electrosorption
Discontinuous immittance due to a saddle node bifurcation: I: 1-, 2- and 3-part immittance diagrams 231
Enzyme kinetics
Comparison of rotating disk and wall-jet electrode systems for studying the kinetics of direct and mediated electron transfer for horseradish peroxidase on a graphite electrode 113

PII S0022-0728(98)00399-4

Expanded clay
Characterization of organosilasesquioxane-intercalated-laponite-clay modified electrodes and (bio)electrochemical applications 73

Ferrocenes
A voltammetric investigation of the reactions between surface-confined amines and quinones on gold electrodes: evidence for imine formation 7
FET-structure
Characterization of the ^{E}MOSFET, a novel one-electrode chemical transducer for redox measurements 23
Flooded porous electrode
Linear sweep voltammetry in flooded porous electrodes at low sweep rates 161
Frumkin isotherm
Discontinuous immittance due to a saddle node bifurcation: I: 1-, 2- and 3-part immittance diagrams 231
FTIR
Electrochemistry of heteropolyanions in coulombically linked self-assembled monolayers 87
FTIR spectra
Electrochemically pH-controllable 3-substituted polythiophene films 155

Growth
A computer simulation model for the diffusion controlled nucleation and growth processes on electrode surfaces—a two-dimensional study 55

Hydrous oxide
Characterization of the ^{E}MOSFET, a novel one-electrode chemical transducer for redox measurements 23

Impedance
Discontinuous immittance due to a saddle node bifurcation: I: 1-, 2- and 3-part immittance diagrams 231
Ion pair formation
Thin layer electrochemical Raman study of ion pair formation between the tetrachlorobenzoquinone anion radical and alkaline earth metal cations 191
ITIES
Spectroelectrochemical approaches to heterogeneous electron transfer reactions at the polarised water | 1,2-dichloroethane interfaces 139

Kinetics
Voltammograms of thin layer Pd | H(D) electrodes in the coexistence of α and β phases 107

Laponite
Characterization of organosilasesquioxane-intercalated-laponite-clay modified electrodes and (bio)electrochemical applications 73
Linear sweep voltammetry
Linear sweep voltammetry in flooded porous electrodes at low sweep rates 161

Membrane-covered electrode
Rotating ring-disk electrode study on the cathodic oxygen reduction at Nafion®-coated gold electrodes 175
Metallothioneins
Electrochemical study of metallothioneins using cyclic voltammetry 199

Nafion®
Rotating ring-disk electrode study on the cathodic oxygen reduction at Nafion®-coated gold electrodes 175
Solid-state electrochemical oxygen reduction at Pt | Nafion® 117 and Pt | BAM3G™ 407 interfaces 1
Non-linearity
Discontinuous immittance due to a saddle node bifurcation: I: 1-, 2- and 3-part immittance diagrams 231
Nonlinear regression
Use of sensitivity analysis methods in the modelling of electrochemical transients: Part 3. Statistical error/uncertainty propagation in simulation and in nonlinear least-squares parameter estimation 209
Nucleation
A computer simulation model for the diffusion controlled nucleation and growth processes on electrode surfaces—a two-dimensional study 55

Ohmic drop
The pseudostationary mercury electrode 43
Overpotential deposition
Underpotential versus overpotential deposition: a first-principles calculation 183
Oxygen reduction
Rotating ring-disk electrode study on the cathodic oxygen reduction at Nafion®-coated gold electrodes 175
Solid-state electrochemical oxygen reduction at Pt | Nafion® 117 and Pt | BAM3G™ 407 interfaces 1

Parameter estimation
Use of sensitivity analysis methods in the modelling of electrochemical transients: Part 3. Statistical error/uncertainty propagation in simulation and in nonlinear least-squares parameter estimation 209
Pd | H electrode
Voltammograms of thin layer Pd | H(D) electrodes in the coexistence of α and β phases 107
Pd | H system
Voltammograms of thin layer Pd | H(D) electrodes in the coexistence of α and β phases 107
Peroxidase orientation
Comparison of rotating disk and wall-jet electrode systems for studying the kinetics of direct and mediated electron transfer for horseradish peroxidase on a graphite electrode 113
Phase transition
Voltammograms of thin layer Pd | H(D) electrodes in the coexistence of α and β phases 107
pH control
Electrochemically pH-controllable 3-substituted polythiophene films 155
Photovoltage digital images
The scanning microscope for semiconductor characterization (SMSC): electrolyte electroreflectance and photovoltage imaging study of the electrochemical activation of RuS_2 photoelectrodes for oxygen evolution 99
Poly(3-alkylthiophene)
Electrochemically pH-controllable 3-substituted polythiophene films 155
Polynuclear hexacyanometallate film electrodes
On the ability of ruthenium to stabilize polynuclear hexacyanometallate film electrodes 149
Polynuclear inorganic films
On the ability of ruthenium to stabilize polynuclear hexacyanometallate film electrodes 149
Polythiophene
Electrochemically pH-controllable 3-substituted polythiophene films 155

Poly(3-thiophene acetic acid)
Electrochemically pH-controllable 3-substituted polythiophene films 155
Potential modulated reflectance
Spectroelectrochemical approaches to heterogeneous electron transfer reactions at the polarised water | 1,2-dichloroethane interfaces 139
Potentiometric sensors
Characterization of the ^{E}MOSFET, a novel one-electrode chemical transducer for redox measurements 23
Probe beam deflection
Combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD): validation of the technique by a study of silver ion mass transport 241
Proton-exchange membrane fuel cell
Rotating ring-disk electrode study on the cathodic oxygen reduction at Nafion®-coated gold electrodes 175
Pseudostationary mercury electrode
The pseudostationary mercury electrode 43

Quinones
A voltammetric investigation of the reactions between surface-confined amines and quinones on gold electrodes: evidence for imine formation 7

Rabbit liver
Electrochemical study of metallothioneins using cyclic voltammetry 199
Raman spectroscopy
Thin layer electrochemical Raman study of ion pair formation between the tetrachlorobenzoquinone anion radical and alkaline earth metal cations 191
Rate constants
Comparison of rotating disk and wall-jet electrode systems for studying the kinetics of direct and mediated electron transfer for horseradish peroxidase on a graphite electrode 113
Redox process
Combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD): validation of the technique by a study of silver ion mass transport 241
Reduction of tetrachlorobenzoquinone
Thin layer electrochemical Raman study of ion pair formation between the tetrachlorobenzoquinone anion radical and alkaline earth metal cations 191
Reduction–oxidation
Electrochemistry of heteropolyanions in coulombically linked self-assembled monolayers 87
Reorganization energies
Reorganization energetics for ferrocene oxidation/reduction in self-assembled monolayers on gold 17
Rotating disk electrode
Comparison of rotating disk and wall-jet electrode systems for studying the kinetics of direct and mediated electron transfer for horseradish peroxidase on a graphite electrode 113
Rotating ring-disk electrode
Rotating ring-disk electrode study on the cathodic oxygen reduction at Nafion®-coated gold electrodes 175
RuS_2
The scanning microscope for semiconductor characterization (SMSC): electrolyte electroreflectance and photovoltage imaging study of the electrochemical activation of RuS_2 photoelectrodes for oxygen evolution 99
Ruthenium
On the ability of ruthenium to stabilize polynuclear hexacyanometallate film electrodes 149
Scanning tunneling microscopy
Structural transitions in 2,2′-bipyridine adlayers on Au(111)—an in-situ STM study 121
Sensitivity analysis
Use of sensitivity analysis methods in the modelling of electrochemical transients: Part 3. Statistical error/uncertainty propagation in simulation and in nonlinear least-squares parameter estimation 209
Silasesquioxane
Characterization of organosilasesquioxane-intercalated-laponite-clay modified electrodes and (bio)electrochemical applications 73
Silver
Combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD): validation of the technique by a study of silver ion mass transport 241
Spatial distribution
A computer simulation model for the diffusion controlled nucleation and growth processes on electrode surfaces—a two-dimensional study 55
Structural transitions
Structural transitions in 2,2′-bipyridine adlayers on Au(111)—an in-situ STM study 121
Sweep rate
Linear sweep voltammetry in flooded porous electrodes at low sweep rates 161

Thin layer electrochemical measurement
Thin layer electrochemical Raman study of ion pair formation between the tetrachlorobenzoquinone anion radical and alkaline earth metal cations 191
Transient methods
Use of sensitivity analysis methods in the modelling of electrochemical transients: Part 3. Statistical error/uncertainty propagation in simulation and in nonlinear least-squares parameter estimation 209

Uncertainty analysis
Use of sensitivity analysis methods in the modelling of electrochemical transients: Part 3. Statistical error/uncertainty propagation in simulation and in nonlinear least-squares parameter estimation 209
Underpotential deposition
Underpotential versus overpotential deposition: a first-principles calculation 183

Wall-jet system
Comparison of rotating disk and wall-jet electrode systems for studying the kinetics of direct and mediated electron transfer for horseradish peroxidase on a graphite electrode 113
Work function
Characterization of the ^{E}MOSFET, a novel one-electrode chemical transducer for redox measurements 23

XPS
Electrochemistry of heteropolyanions in coulombically linked self-assembled monolayers 87
